NEWEST HOT QUESTIONS ABOUT ONLINE SECURITY

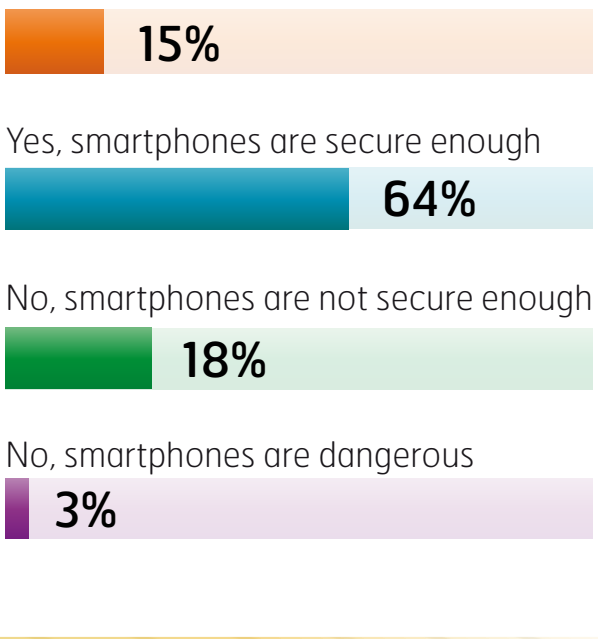

ARE WE AFFRAID OF ONLINE THREATS?

We are used to reading every written agreement before putting a signature to it, but as far as the End-User License Agreements are concerned, we endorse anything. Doesn't matter what obligations are included, 90 per cent of us click on 'Agree' just to have a program installed. How careless this is! Just imagine all the things that could be written there. We looked into some PC and mobile users' habits, vices and opinions, and the results will amaze you.

90% of users never read the EULA (End-User License Agreement) while installing a product

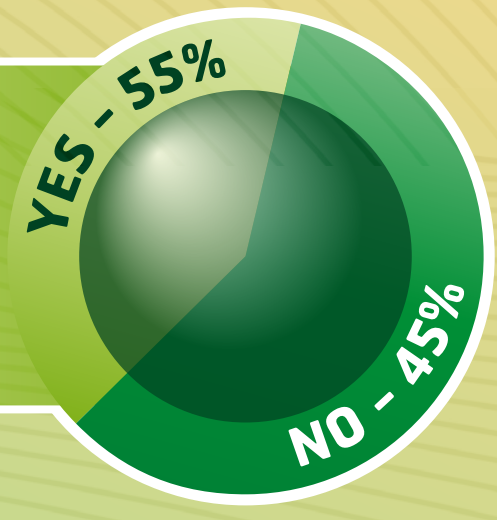

ARE YOU SATISFIED WITH THE OVERALL SECURITY OF SMARTPHONES?

Who is satisfied with the overall security of smartphones the most?

Would you use a security product which sends your files to the cloud without your knowledge or without it asking for permission?

PC and mobile users think that **digital home** is a good concept **BUT** ITS SECURITY NEEDS TO BE INCREASED !

SECURITY SOLUTIONS OF 2015

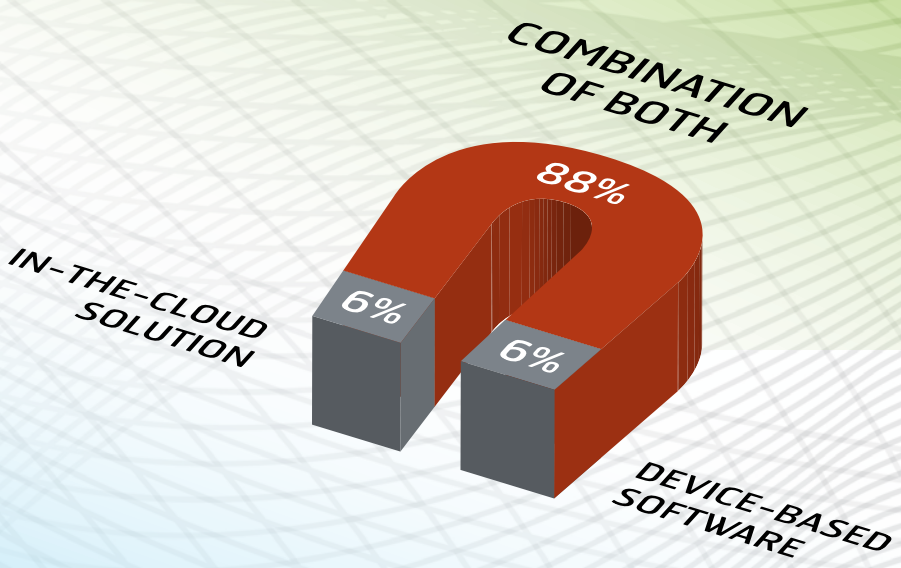

Only the IRANIANS think that the future of security solutions belongs to **DEVICE-BASED SECURITY SOFTWARE**

Only the SPANIARDS think that the future of security solutions belongs to **IN-THE-CLOUD SOLUTIONS**

In your opinion, what kind of security solution will prevail three years from now?

The TrustPort survey was taken over a period of one year. The involved respondents came from 30 different countries around the world (America, Europe, Asia and Africa).
